Uzair Khan

Frontend Web developer | javaScript | vue | NuxtJs | Angular

Detail-oriented FrontEnd Web developer with over 1.3 years of experience in creating intuitive, responsive, and scalable web applications.

EXPERIENCE

I specialize in building responsive and dynamic web applications using Vue, Angular. I collaborate closely with designers and developers to create seamless user experiences while ensuring optimized performance, efficient state management with Vuex and Redux Toolkit, and cross-browser compatibility. I prioritize writing modular, reusable, and maintainable code while staying updated with the latest industry trends and best practices. Additionally, I am proficient in Git for version control, CI/CD pipelines, and collaborative development.
